PROFESSIONAL EXPERIENCE

Prosty, Remote — *Front-End*

June 2022 - March 2023

Connect with stylists and fashion enthusiasts to discover and purchase clothing that matches your personality. (Canadian Startup)

- Made a new design system and created UI/UX while preserving simplicity and aesthetics.
- Constructed the front-end using React, Next.js, and Tailwind CSS.
- Performed a significant speed optimization that reduced the page load to about 30% using compression and minification.

JSU, Remote — *Front-End*

February 2021 - April 2022

“Just Show Up” is a platform for medical professionals to work together and utilize AI to improve diagnostics. JSU is an American startup.

- Designed and prototyped a fluid user interface in Sketch and worked with the team to solve UI challenges.
- Developed the front-end using React, Tailwind CSS, HTML5, and JavaScript while collaborating on a list of product features.

Freelance Full-Stack Developer

March 2019 - PRESENT

Built websites for local and distant clients and sold templates and plugins on the Envato market.

WP Custom Cursors

- Engineered a highly sought-after custom cursor plugin for WordPress that successfully garnered over 5K active installs.

NarvanCapital (<https://narvancapital.com/>)

- Built a modern website with a referral system, protected content, and income management tools for a crypto signal provider.

Time.af

- Built a website that displays and converts time and dates across diverse calendars.
- Worked on SEO improvements that significantly increased the monthly traffic to about 15.3K.
